

Are your outdoor blinds being *Cleaned & Protected!*

EasiClean

Great Cleaning Solutions for Visiontex™ & Easislip™ Outdoor Blinds

EasiGuard

Great Protectant for Visiontex™ & Easislip™ Outdoor Blinds

Clean & Protect

What is EasiClean™

EasiClean™ spot remover utilises a proprietary blend of sequester agents, surfactants and hyper-wetting agents to lift and suspend oil, grease and dirt for easy rinse and removal. Purpose engineered for Easislip™ PVC films and Visiortex™ PVC coated mesh, EasiClean™ assists in maintaining “top coat” integrity for polyvinyl chloride (PVC) surfaces. Protecting vinyl topcoat reduces plasticizer migration keeping vinyl supple and flexible. As most PVC is UV sensitive and degrades over time, maintaining topcoat integrity assists protection against UV damage, an important key in keeping your vinyl looking and performing “like new”.

Simple Cleaning

Keeping vinyl clean is an important part of routine maintenance. Dirt acts as an abrasive and can also wear out any threads in seams. Mildew grows on damp, dirty vinyl.

The recommended vinyl cleaning method is

- 1) Rinse with cool water taking care to remove any particles on the surface of the material to avoid scratches when wiping with a cleaning cloth.
- 2) Spray on EasiClean™ spot remover until damp.
- 3) Completely wipe away dirt and grime with a clean, absorbent, non-abrasive micro fibre cloth until clean, rinsing out cloth as required.
- 4) Rinse thoroughly with water and allow to dry completely before use*.
- 5) Avoid harsh cleaners, abrasives, petroleum distillates and alcohols

*Please note blinds rolled up wet or damp for any length of time could encourage mildew growth.

EasiClean™ saves money and adds years to the life of your blinds.

Reseller:

What is EasiGuard™

Developed from aeronautical specifications, EasiGuard™ enhances the UV screening properties of Easislip™ PVC films and Visiortex™ PVC mesh products. Unlike other “protectant” products, EasiGuard™ does not contain silicone oils, waxes, glycerin or petroleum distillates. EasiGuard™ leaves a non-oily, anti-static finish that does not attract dust. With a “like new” optically enhanced finish for clearer vision appearance, blinds treated with EasiGuard™ stay cleaner longer with reduced maintenance demand.

EasiGuard™ will offer you:

- Powerful UV screening treatment for all Easislip™ and Visiortex™ blind surfaces. Regular use will delay plasticizer migration reducing UV fading and degradation.
- Added protection repelling dust, dirt, oils, tree sap and stains maintaining surface integrity longer.
- Regular use every 30-45 days aids restoration of lost colour and lustre, making faded PVC vinyl surfaces look “factory new” again.

“SPF 40 SUNSCREEN... For your blinds”

Simple Application

Keeping a regular maintenance program of cleaning and protecting PVC top coat surfaces is an important part of enhancing the life and performance of your Easislip™ and Visiortex™ blinds. The recommended application method is as follows.

- 1) Begin with EasiClean™ spot remover following closely cleaning instructions as recommended
- 2) Make sure all surfaces are completely dry.
- 3) Spray on EasiGuard™ until thoroughly damp, overlapping sprayed areas but **DO NOT SATURATE**.
- 4) Wipe dry using only clean, absorbent, non-abrasive, micro fibre cloths.
- 5) Allow surface to dry thoroughly before use*

*Please note blinds rolled up wet or damp for any length of time could encourage mildew growth

MILDEW

Dirt and moisture are essential to mildew propagation. Thus a regular maintenance program keeping vinyl clean and dry is crucial to preventing mildew. Dirty vinyl + dampness = MILDEW. EasiGuard™ treated vinyl repels dirt, dust and other mildew-loving contaminants. EasiGuard™ also repels water so treated surfaces dry quicker. Mildew problems will be far less of a problem wherever EasiGuard™ protectants form part of a regular maintenance program.

EasiGuard™ Saves money & adds years to your Easislip™ & Visiortex™ blind fabrics.
