

Italia – Full Cassette Awning

(with Spring Loaded Arms)
from B A T Italy

The *Italia Full cassette* awning system offers customers full protection for their chosen fabric from UV, and birds etc, by enclosing the fabric in the top powder-coated cassette box.

Powder-coated to any available powder-coat colour, the *Italia Full Cassette* awning offers customers a distinctive awning, with many practical, and clever features.

The all aluminium construction, (except the roller tube, which is galvanized steel), this beautifully styled awning will add value to your home or office.

The *Italia full cassette* model uses spring loaded arms to ease the fabric back into the fully enclosed cassette, whether the *Italia full cassette* is motorized, or manually operated using a gearbox and crank handle. The operation of the awning is both smooth and effortless.

As the awning closes, the sculptured bottom rail fits snugly into the top cassette box, to form a weather-proof, and bird proof enclosure to protect the fabric.

The picture to the right shows the cassette box in the fully closed position, with all of the external aluminium parts powder-coated for years of protection.

The very neat closure of the cassette is a feature of this awning often commented upon by many customers.

Whether the *Italia Full Cassette* model is fitted with two or three arms the same robust construction and application of the spring loaded arms will ensure the full cassette system closes every time.

In the standard form of the awning, it is driven by a crank handle and gear-box. In increasing numbers, many customers are choosing to motorize the *Italia Full Cassette* model, with a choice of either a wall switch, or by hand held remote control - either way, motorization is proving a popular choice with many buyers of the *Italia Full Cassette* awning.

Available in sizes up to 5 metres wide, with a near vertical drop of 3600mm, the *Italia Full Cassette* models will suit most window sizes.

Italia Spring Arm Awning (without head-box)

The style of the *Italia* awning can also be seen without the Full Cassette features.

Using the same spring-loaded arms, and a different bottom rail, the *Italia Spring Arm Awning* can be manufactured to suit most window sizes.

With arm sizes as small as 600mm, and as large as 1800mm, with a variety of sizes in between, the *Italia Spring Arm Awning* will meet the demands of the largest windows. Added to these dimensions is the fact the *Italia Spring Arm Awning* can be manufactured with three or four arms to cater for extra wide windows.

The mounting brackets, and arms are made from aluminium, and are powder-coated to enhance the appearance of the awning, and at the same time afford the owner the knowledge these parts cannot rust.

The Galvanised steel tubing used to store the fabric at the top of the awning, has been specially manufactured for the awnings industry, and thus the coatings on the tubing are designed to provide years of useful service.

The Bottom Rail is made from extruded aluminium and is also powdercoated. The end caps for this section are diecast, and also powdercoated for optimum style and appearance.

The *Italia Spring Arm Awning* can be operated by a conventional crank-handle and gear-box, or motorized to suit your requirements. The motor can be controlled by a wall switch, or by a hand held remote control device.
